Subject index

Acetonitrile
Determination of the kinetic and activation parameters for the electro-oxidation of *N,N,N′,N′*-tetramethyl-*p*-phenylenediamine (TMPD) in acetonitrile (ACN) by chronocoulometry and other electrochemical techniques (Fernández, Zón) 251
Aging
Investigations on glassy carbon deactivation on aging in air (Mentus et al.) 449

Bisulphate ion
Radioactive labeling study of sulfate/bisulfate adsorption on smooth gold electrodes (Zelenay et al.) 389
p-Bromoanilines
Effect of methyl groups as *o*-substituents on the anodic decomposition pathways of substituted *p*-bromoanilines in aqueous sulphuric acid solutions at a platinum electrode (Arias et al.) 231
Buffered solutions
Study of the electrochemical behavior of nicotinamide in buffered solutions (Marín Galvín, Rodríguez Mellado) 337

Cadmium selenide
Electrochemical characteristics of silver treated cadmium selenide single crystal electrodes (Uosaki et al.) 167
Caesium
Prospects for the direct determination of the dielectric constant of water in the double layer using model adsorption experiments in UHV: coadsorption of Cs and H_2O on Cu (110) (Sass et al.) 441
Carbon
Oxide formation and reactivity for methanol oxidation on platinised carbon anodes (Kennedy, Hamnett) 271
Carbon monoxide
A quantum-chemistry approach to the electro-oxidation mechanism of adsorbed carbon monoxide on platinum single-crystal clusters (Estiú et al.) 303
Carboxylic acids
Adsorption kinetics of electrode processes and the mechanism of Kolbe electrosynthesis. Part I. Adsorption of carboxylic acids and the nature of the particles chemisorbed on platinum electrodes (Vassiliev, Grinberg) 359
Cerium ion
Electron excitation during anodic decomposition of III–V compounds induced by hole injecting species (Ce^{4+}) (Etcheberry et al.) 177
Chemically modified sensors
The use of microelectrodes as substrates for chemically modified sensors. A comparison with conventionally sized electrodes (John, Wallace) 87
Chemiluminescence
Direct current electrogenerated chemiluminescence observed with $[Ro(bpz)_3]^{2+}$ in fully aqueous solution (Yamazaki-Nishida et al.) 455
Chronocoulometry
Determination of the kinetic and activation parameters for the electro-oxidation of *N,N,N′,N′*-tetramethyl-*p*-phenylenediamine (TMPD) in acetonitrile (ACN) by chronocoulometry and other electrochemical techniques (Fernández, Zón) 251
Clay modified electrodes
Clay modified electrodes. Part 10. Studies of clay-adsorbed $Ru(bpy)_3^{2+}$ enantiomers by UV–visible spectroscopy and cyclic voltammetry (Villemure, Bard) 403
Cobalt porphyrins
Electrocatalysis of metalloporphyrins. Part 9. Catalytic electroreduction of cystine using water-soluble cobalt porphyrins (Wang, Pang) 349

Composite electrodes
Electrical modulation of the solution pH near polyaniline and its composite electrodes (Sawai et al.) 221
III–V compounds
Electron excitation during anodic decomposition of III–V compounds induced by hole injecting species (Ce^{4+}) (Etcheberry et al.) 177
Computer-assisted voltammetry
Computer-assisted voltammetry with a multilevel random signal. Part II. Acquisition of the dynamic characteristics of an electrode process coupled with a kinetic chemical reaction (Yamagishi) 115
Copper
Prospects for the direct determination of the dielectric constant of water in the double layer using model adsorption experiments in UHV: coadsorption of Cs and H_2O on Cu (110) (Sass et al.) 441
Counteranions
The influence of counteranions and pH on the capacitive current of conducting polyaniline (Geniès et al.) 205
Cyclic voltammetry
A new approach to electrochemical simulations based on eigenvalue–eigenvector solutions of the diffusion equation. Part II. Cyclic voltammetry and heterogeneous kinetics (Kavanaugh et al.) 1
Digital simulation of cyclic voltammetric curves when the oxidized and the reduced forms of a redox couple are present in solution (Demortier, Jehoulet) 15
Fast cyclic voltammetry: measurement of dopamine in the presence of its biological precursors and metabolites (Hafizi et al.) 125
Cyclodextrin
Electrochemical and electron spin resonance study on the interaction between α-cyclodextrin and the electrochemically generated radical intermediate of *p*-nitrophenolate anion (Kano et al.) 187
Cystine
Electrocatalysis of metalloporphyrins. Part 9. Catalytic electroreduction of cystine using water-soluble cobalt porphyrins (Wang, Pang) 349

Desorption studies
Desorption studies at a hanging mercury drop electrode by a flow injection method (Sawamoto, Gamoh) 421
4,4′-Dicyanophenyl viologen
Electrochromic properties of vacuum-evaporated organic thin films. Part 3. The case of 4,4′-dicyanophenyl viologen (Yasuda, Seto) 197
Dielectric constant
Prospects for the direct determination of the dielectric constant of water in the double layer using model adsorption experiments in UHV: coadsorption of Cs and H_2O on Cu (110) (Sass et al.) 441
Diffusion equation
A new approach to electrochemical simulations based on eigenvalue–eigenvector solutions of the diffusion equation. Part II. Cyclic voltammetry and heterogeneous kinetics (Kavanaugh et al.) 1
Digital simulation
Digital simulation of cyclic voltammetric curves when the oxidized and the reduced forms of a redox couple are present in solution (Demortier, Jehoulet) 15
Dopamine
Fast cyclic voltammetry: measurement of dopamine in the presence of its biological precursors and metabolites (Hafizi et al.) 125
Double layer
Prospects for the direct determination of the dielectric constant of water in the double layer using model adsorption experiments in UHV: coadsorption of Cs and H_2O on Cu (110) (Sass et al.) 441
Dropping mercury microelectrode
A dropping mercury microelectrode (DMμE) for the direct determination of surface charge densities (Baars et al.) 99
Dynamic characteristics
Computer-assisted voltammetry with a multilevel random signal. Part II. Acquisition of the dynamic characteristics of an electrode process coupled with a kinetic chemical reaction (Yamagishi) 115

Eigenvalue–eigenvector solutions
A new approach to electrochemical simulations based on eigenvalue–eigenvector solutions of the diffusion equation. Part II. Cyclic voltammetry and heterogeneous kinetics (Kavanaugh et al.) 1

Electron excitation
Electron excitation during anodic decomposition of III–V compounds induced by hole injecting species (Ce^{4+}) (Etcheberry et al.) 177
Electron hopping
Electron hopping in immobilized polyvalent and/or multicouple redox systems (Baldy et al.) 53
Electron spin resonance
Electrochemical and electron spin resonance study on the interaction between α-cyclodextrin and the electrochemically generated radical intermediate of *p*-nitrophenolate anion (Kano et al.) 187
Ethanol
Structural effects in electrocatalysis. Oxidation of ethanol on platinum single crystal electrodes. Effect of pH (Morin et al.) 287

Fast cyclic voltammetry
Fast cyclic voltammetry: measurement of dopamine in the presence of its biological precursors and metabolites (Hafizi et al.) 125
Flow injection method
Desorption studies at a hanging mercury drop electrode by a flow injection method (Sawamoto, Gamoh) 421
Fluorine
Thermodynamics of Ti–H_2O–F(–Fe) systems at 298 K (Kelsall, Robbins) 135

Gallium arsenide
STM characteristics of n-GaAs and p-GaP in electrolyte solution (Carlsson et al.) 425
Gallium phosphide
STM characteristics of n-GaAs and p-GaP in electrolyte solution (Carlsson et al.) 425
Glassy carbon
Investigations on glassy carbon deactivation on aging in air (Mentus et al.) 449
Gold
Modulated reflectance spectroscopy and voltammetry of the sulphide/gold system (Lezna et al.) 319
Radioactive labeling study of sulfate/bisulfate adsorption on smooth gold electrodes (Zelenay et al.) 389

Heterogeneous kinetics
A new approach to electrochemical simulations based on eigenvalue–eigenvector solutions of the diffusion equation. Part II. Cyclic voltammetry and heterogeneous kinetics (Kavanaugh et al.) 1
Hole injection
Electron excitation during anodic decomposition of III–V compounds induced by hole injecting species (Ce^{4+}) (Etcheberry et al.) 177

Inlaid disc microelectrode
Growth of mercury electrodeposits on an inlaid disc. Voltammetric theory and experiments (Colyer et al.) 379
Iron
Thermodynamics of Ti–H_2O–F(–Fe) systems at 298 K (Kelsall, Robbins) 135

Kolbe electrosynthesis
Adsorption kinetics of electrode processes and the mechanism of Kolbe electrosynthesis. Part I. Adsorption of carboxylic acids and the nature of the particles chemisorbed on platinum electrodes (Vassiliev, Grinberg) 359

Liquid junction potential
Liquid junction potential between different solvents. Some new information on the component due to solvent–solvent interactions (Izutsu et al.) 435

Mercury
Desorption studies at a hanging mercury drop electrode by a flow injection method (Sawamoto, Gamoh) 421
Growth of mercury electrodeposits on an inlaid disc. Voltammetric theory and experiments (Colyer et al.) 379
Metalloporphyrins
Electrocatalysis of metalloporphyrins. Part 9. Catalytic electroreduction of cystine using water-soluble cobalt porphyrins (Wang, Pang) 349
Methanol
Oxide formation and reactivity for methanol oxidation on platinised carbon anodes (Kennedy, Hamnett) 271
Methyl groups
Effect of methyl groups as *o*-substituents on the anodic decomposition pathways of substituted *p*-bromoanilines in aqueous sulphuric acid solutions at a platinum electrode (Arias et al.) 231

Micelles
An application of the Poisson–Boltzmann equation inside a spherical cavity. Calculus of the equilibrium radius of reverse micelles in the presence of a saline solution (Caselli, Maestro) 67
Microelectrodes
A dropping mercury microelectrode (DMμE) for the direct determination of surface charge densities (Baars et al.) 99
Growth of mercury electrodeposits on an inlaid disc. Voltammetric theory and experiments (Colyer et al.) 379
The use of microelectrodes as substrates for chemically modified sensors. A comparison with conventionally sized electrodes (John, Wallace) 87
Micropores
Salt exclusion from charged and uncharged micropores (Vlachy et al.) 77
Modulated reflectance spectroscopy
Modulated reflectance spectroscopy and voltammetry of the sulphide/gold system (Lezna et al.) 319
Multicouple redox systems
Electron hopping in immobilized polyvalent and/or multicouple redox systems (Baldy et al.) 53
Multi-level random signal
Computer-assisted voltammetry with a multilevel random signal. Part II. Acquisition of the dynamic characteristics of an electrode process coupled with a kinetic chemical reaction (Yamagishi) 115

Nicotinamide
Study of the electrochemical behavior of nicotinamide in buffered solutions (Marín Calvín, Rodríguez Mellado) 337
p-Nitrophenolate ion
Electrochemical and electron spin resonance study on the interaction between α-cyclodextrin and the electrochemically generated radical intermediate of *p*-nitrophenolate anion (Kano et al.) 187
Nucleation and growth
Three-dimensional nucleation and growth under controlled potential (Mirkin, Nilov) 35

Oxide formation
Oxide formation and reactivity for methanol oxidation on platinised carbon anodes (Kennedy, Hamnett) 271

pH
Electrical modulation of the solution pH near polyaniline and its composite electrodes (Sawai et al.) 221
The influence of counteranions and pH on the capacitive current of conducting polyaniline (Genies et al.) 205
Structural effects in electrocatalysis. Oxidation of ethanol on platinum single crystal electrodes. Effect of pH (Morin et al.) 287
Platinum
Adsorption kinetics of electrode processes and the mechanism of Kolbe electrosynthesis. Part I. Adsorption of carboxylic acids and the nature of the particles chemisorbed on platinum electrodes (Vassiliev, Grinberg) 359
Effect of methyl groups as *o*-substituents on the anodic decomposition pathways of substituted *p*-bromoanilines in aqueous sulphuric acid solutions at a platinum electrode (Arias et al.) 231
A quantum-chemistry approach to the electro-oxidation mechanism of adsorbed carbon monoxide on platinum single-crystal clusters (Estiu et al.) 303
Structural effects in electrocatalysis. Oxidation of ethanol on platinum single crystal electrodes. Effect of pH (Morin et al.) 287
Poisson–Boltzmann equation
An application of the Poisson–Boltzmann equation inside a spherical cavity. Calculus of the equilibrium radius of reverse micelles in the presence of a saline solution (Caselli, Maestro) 67
Polyaniline
Electrical modulation of the solution pH near polyaniline and its composite electrodes (Sawai et al.) 221
The influence of counteranions and pH on the capacitive current of conducting polyaniline (Geniès et al.) 205
Polyvalent redox systems
Electron hopping in immobilized polyvalent and/or multicouple redox systems (Baldy et al.) 53

Quantum chemistry
A quantum-chemistry approach to the elec-

tro-oxidation mechanism of adsorbed carbon monoxide on platinum single-crystal clusters (Estiú et al.) 303

Radioactive labeling
Radioactive labeling study of sulfate/bisulfate adsorption on smooth gold electrodes (Zelenay et al.) 389

Redox couple
Digital simulation of cyclic voltammetric curves when the oxidized and the reduced forms of a redox couple are present in solution (Demortier, Jehoulet) 15

Reverse micelles
An application of the Poisson–Boltzmann equation inside a spherical cavity. Calculus of the equilibrium radius of reverse micelles in the presence of a saline solution (Caselli, Maestro) 67

Ruthenium bipyrazine ion
Direct current electrogenerated chemiluminescence observed with $[Ru(bpz)_3]^{2+}$ in fully aqueous solution (Yamazaki-Nishida et al.) 455

Ruthenium bipyridine ion
Clay modified electrodes. Part 10. Studies of clay-adsorbed $Ru(bpy)_3^{2+}$ enantiomers by UV–visible spectroscopy and cyclic voltammetry (Villemure, Bard) 403

Saline solution
An application of the Poisson–Boltzmann equation inside a spherical cavity. Calculus of the equilibrium radius of reverse micelles in the presence of a saline solution (Caselli, Maestro) 67

Salt exclusion
Salt exclusion from charged and uncharged micropores (Vlachy et al.) 77

Scanning tunnelling microscopy
STM characteristics of n-GaAs and p-GaP in electrolyte solution (Carlsson et al.) 425

Silver
The effect of surface charge on the surface conductance of silver in surface inactive electrolytes (Tucceri, Posadas) 159
Electrochemical characteristics of silver treated cadmium selenide single crystal electrodes (Uosaki et al.) 167

Solvent–solvent interactions
Liquid junction potential between different solvents. Some new information on the component due to solvent–solvent interactions (Izutsu et al.) 435

Spherical cavity
An application of the Poisson–Boltzmann equation inside a spherical cavity. Calculus of the equilibrium radius of reverse micelles in the presence of a saline solution (Caselli, Maestro) 67

Structural effects
Structural effects in electrocatalysis. Oxidation of ethanol on platinum single crystal electrodes. Effect of pH (Morin et al.) 287

Sulphate ion
Radioactive labeling study of sulfate/bisulfate adsorption on smooth gold electrodes (Zelenay et al.) 389

Sulphide
Modulated reflectance spectroscopy and voltammetry of the sulphide/gold system (Lezna et al.) 319

Sulphuric acid
Effect of methyl groups as o-substituents on the anodic decomposition pathways of substituted *p*-bromoanilines in aqueous sulphuric acid solutions at a platinum electrode (Aris et al.) 231

Surface charge
The effect of surface charge on the surface conductance of silver in surface inactive electrolytes (Tucceri, Posadas) 159

Surface charge densities
A dropping mercury microelectrode (DMμE) for the direct determination of surface charge densities (Baars et al.) 99

Surface inactive electrolytes
The effect of surface charge on the surface conductance of silver in surface inactive electrolytes (Tucceri, Posadas) 159

N,N,N′,N′-tetramethyl-*p*-phenylenediamine
Determination of the kinetic and activation parameters for the electro-oxidation of *N,N,N′,N′*-tetramethyl-*p*-phenylenediamine (TMPD) in acetonitrile (ACN) by chronocoulometry and other electrochemical techniques (Fernández, Zón) 251

Thermodynamics
Thermodynamics of $Ti–H_2O–F(–Fe)$ systems at 298 K (Kelsall, Robbins) 135

Thin films
Electrochromic properties of vacuum-evaporated organic thin films. Part 3. The case of

4,4′-dicyanophenyl viologen (Yasuda, Seto) 197

Titanium
Thermodynamics of Ti–H_2O–F(–Fe) systems at 298 K (Kelsall, Robbins) 135

Vacuum-evaporated organic thin films
Electrochromic properties of vacuum-evaporated organic thin films. Part 3. The case of 4,4′-dicyanophenyl viologen (Yasuda, Seto) 197

Water
Prospects for the direct determination of the dielectric constant of water in the double layer using model adsorption experiments in UHV: coadsorption of Cs and H_2O on Cu (110) (Sass et al.) 441
